OBJECTIVE

- Detail-oriented and certified Software QA Engineer with 2+ years of experience in Agile environments across automotive, healthcare, banking, and insurance domains. Strong expertise in manual and automation testing, with hands-on experience in diffident tools. Proven ability to collaborate cross-functionally, mentor team members, and contribute to CI/CD pipelines for high-quality, scalable software solutions

EXPERIENCE

EXPLEO Technologies India Pvt Ltd

September 2022 – June 2024

Associate Software Engineer

Bengaluru, Karnataka

- Test Planning and Develop Test Cases: Reviewed software requirements and created 100+ detailed test cases aligned with business goals to ensure comprehensive functionality and coverage.
- Test Case Execution: Performed manual and exploratory testing on infotainment systems for automotive clients BMW and Mini Cooper.
- Defect Management: Led defect management and regression testing efforts during release cycles, including Vehicle Testing, NVH Testing, and Safety Validation; logged and tracked defects in Jira.
- Requirement Review: Review project requirements for clarity, completeness, and consistency to align with client expectations.
- Automation: Developed a Python automation tool for CAN signal testing, reducing test execution time by 88% .
- Collaboration and Client Interaction: Communicate with clients to understand needs, provide updates, address concerns, and maintain positive relationships.
- Leadership: Led the end-to-end management of test deliverables, ensuring timely and high-quality delivery in alignment with project objectives.
- Technical Advice: Offer technical guidance to team members, assisting with challenges and promoting best practices.
- Training and Onboarding: Train and mentor new team members on project processes, tools, and standards.

PROJECTS

Garmin | *Clients -BMW, Mini Cooper*

September 2022 – January 2024

- Testing and QA: Test Planning, Requirement Extraction, Tagging, preparing Requirement Traceability Matrix, Test execution, Defect management, Vehicle Testing, Safety Testing, Noise, Vibration, and Harshness (NVH) Testing and Quality Control.

Tools

- Jira, DOORS, PuTTY, Ediabas, CANoe, FAT Tool, Instrument Panel Cluster (IPC), CAN/Ethernet, E-sys, Software flashing, MS PowerPoint, MS Excel, MS Word, Share Point.

Expleo Internal Projects

January 2024 – June 2024

- Developed an automation tool utilizing CAN database signals and values specified in test cases.
- Leveraging Python expertise, achieved 88% time reduction by completing an 8-hour workload in just 1 hour.

DevOps Trained Resource

September 2024 – february 2025

Banking Domain Project

- * Implemented a CI/CD pipeline using Jenkins and Docker to automate code deployment.
- * Deployed a microservices-based application on Kubernetes, ensuring high availability and scalability.
- * Requirement Review: Review project requirements for clarity, completeness, and consistency to align with client expectations.
- * Monitored system performance using Prometheus and Grafana to optimize resource utilization

Healthcare Domain Project

- * Designed and deployed an AWS-based infrastructure using Terraform for Infrastructure as Code (IaC).
- * Integrated Docker containers with Kubernetes to ensure seamless application deployment
- * Set up a centralized logging and monitoring system with Grafana and Prometheus to track application health.
- * Collaborated with development and operations teams, bridging the gap between Dev and Ops for improved workflow efficiency.

Insurance Domain Project

- * Developed a fully automated deployment pipeline using Jenkins and Terraform for AWS infrastructure provisioning.
- * Containerized and orchestrated applications using Docker and Kubernetes for better scalability
- * Automated infrastructure monitoring using Prometheus and Grafana, reducing incident resolution time.

DevOps Tools & Technologies

- * CI/CD: Jenkins, Git, GitHub Actions
- * Containerization & Orchestration: Docker, Kubernetes
- * Infrastructure as Code (IaC): Terraform, AWS CloudFormation
- * Configuration Management: Ansible,
- * Cloud Platforms: AWS (EC2, S3, VPC, IAM)
- * Monitoring & Logging: Prometheus, Grafana,
- * Operating Systems: Linux (Ubuntu, CentOS), Windows Server
- * Version Control: Git, GitHub
- * JIRA, Microsoft Visual Studio (VS)

ITIL-4 Trained Resource | *IT Service Management (ITSM)* July,2024 – September,2024

- * Incident, Problem, and Change Management – Ensured seamless IT operations by following structured ITIL 4 frameworks.
- * Service Request & Knowledge Management – Improved service efficiency through proper documentation and automation.
- * Integration of ITIL with DevOps – Applied ITIL 4 principles to enhance CI/CD pipeline reliability and incident resolution.
- * Continual Service Improvement (CSI) – Identified and implemented process optimizations for enhanced system performance.
- * SLA & Compliance Management – Ensured adherence to service level agreements (SLAs) and regulatory compliance.
- * Monitoring & Service Reliability – Used ITIL methodologies alongside DevOps tools (Prometheus, Grafana) for proactive issue resolution.
- * Collaboration with Cross-Functional Teams – Bridged the gap between development, operations, and IT support for smoother service delivery.

TECHNICAL SKILLS

- | | | |
|--|----------------------------------|------------------------------------|
| • Test case development | • Monitoring & Logging | • Debugging |
| • Continuous Integration & Continuous Deployment (CI/CD) | • Version Control Systems (VCS) | • SDLC and STLC |
| • Infrastructure as Code (IaC) | • Defect Management | • test management |
| • Configuration Management & Automation | • Software Development Lifecycle | • ECU (Electronic Control Unit) |
| • Cloud Platforms & Services | • SVN (Configuration Management) | • CAN Protocol |
| | • Software Testing/Development | • Script Writing |
| | • UDS-Protocol | • Operating System: Windows, Linux |

CERTIFICATION

- | | | |
|---------------------------|-------------------------------|---|
| • DevOps Engineer | • Computer Society India | • Docker Essentials: A Developer Introduction |
| • ITIL-4 Certification | • UI/UX Designer | • Scalable Web Applications on Kubernetes |
| • ISTQB Certification | • Python | • StarAgile Internship Certificate |
| • Innovation Jam Series 9 | • Functional Safety ISO 26262 | |
| • Information Security | • DevOps Fundamentals | |

EDUCATION

Jamia Hamdard University

Bachelor of Electronics and Communications Engineering

August 2017 – May 2021

New Delhi, Delhi

LEADERSHIP/EXTRACURRICULAR

Computer Society of India | *Jamia Hamdard University*

December 2017 – May 2020

- Managed executive board members and ran weekly meetings, Led 40+ members to work towards goals that improve, promote community service and academics.

Sports:Cricket | *Academy/University/Office*

2009- 2020

- **Role:** Experienced top-order batsman with 11 years of academic background and active participation in University/office league.
